

TRAVEL FURTHER. TRAVEL CLEANER.

Revolutionary oil additives that
are changing the future

OUR MISSION

For many years now, the pressure of climate change has been increasing, so we wanted to come together to create an innovative solution to this global problem.

With our 70 years' combined experience in the oil industry, we've created a revolutionary oil additive that is tackling the biggest challenge of all.

We also want to help prevent the hundreds of new and established businesses closing down due to ever increasing fuel and operational costs and inflation.

Join us as we help businesses travel further and travel cleaner.

Introducing FRS-1

FRS-1 is our revolutionary oil additive that is transforming the fuel costs and environmental impact of businesses across the UK.

What does it do?

FRS-1 is applied to the engine, gearbox or driven axle of a vehicle to produce multiple positive effects.

Reduces temperature within the engine

Reduces friction between moving parts

Coats and lubricates internal parts

What does this mean?

As a result of these effects, our additive generates outcomes that can't be created by any other product on the market.

Lowers fuel consumption by up to 20%

Lowers CO₂ emissions by up to 20%

Reduces maintenance and repair costs

Extends the life-cycle of costly assets

Who can we help?

FRS-1 can be applied to any engine, gearbox or driven axle, allowing many industries to benefit from our oil additive.

Your challenge, our solution

Whilst there are many fantastic solutions appearing that will have a positive impact on the future, few provide an immediate solution to the challenges being faced right now.

Economics

Adoption

Sustainability

Reality

Fossil fuels will be around for many years.

Operational costs are sky high, fuel costs continue to rise, and new technology such as electric vehicles require huge capital to adopt. What is the solution RIGHT NOW?

Time to make a change

MRS Additives exists to tackle the challenges mentioned with an affordable solution that gets to work immediately. We offer a free trial to help you get started.

Claim your free,
no obligations trial

Complete the trial,
